

UARX Space offers in-Space transportation services for small satellites, giving our customers the opportunity to arrive at virtually any destination in space.

Customers can take the advantage to contract only one solution provider that will take care of every aspect of their mission while they just enjoy their flight.

Having its own and highly reliable products at the lowest price makes UARX Space the best option in the market.

BUSINESS MODEL

We sell our products and services through our website, direct contact with customers, and through distributors.

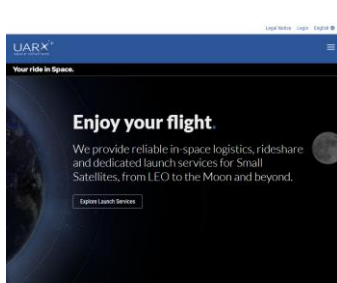

With the lowest price per kilogram in the market, we offer turnkey logistic service solutions to our customers.

Charging just 16,000 euros per kilogram sent to space, our price is 25% lower than the closest competitor.

The most advanced 12U CubeSat deployer

RAMI provides an advanced payload deployment with multiple activation mechanisms, as well as redundant activation lines. It also provides an optional interface to charge the CubeSat.

FINANCING

We have partnered with the best companies and institutions in the sector, who are providing their products to develop the vehicle we use for the service. The value of these products are over 800,000 euros. The rest of the investment came from the founders.

We are seeking for investors to scale up.

MILESTONS ACHIEVED

We finished with the development of two MVPs, that are currently being sold to our customers, and in some cases to competitors.

We won two prizes for being the best Startup: MindTech 21 and AJE Vigo 21.

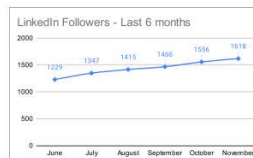

COMPETITORS

There are only three other companies in the world offering Space Logistics and In-Orbit Transportation Services for Small Satellites:

- D-Orbit, in Italy
- Spaceflight, in the United States
- EXOLaunch, in Germany

KPIs

TEAM

Yanina S. Hallak Fiorenza
CEO

Co-founder, and Structural & Thermal Aerospace Engineer. Demonstrated experience working in the aerospace, aviation, and automotive industries, among others.

Andrés E. Villa
CTO

Co-founder and Aerospace & Thermal Aerospace Engineer. Highly qualified in technical developments and management. Extensive trajectory in the traditional space industry.
